

# SAFETY ASSURANCE GLOBAL

CAPABILITY STATEMENT | SEPTEMBER 2026

Independent assurance, operational readiness, safety governance, QA/QC, risk and workforce support

## WHAT SAFETY ASSURANCE GLOBAL DOES

Safety Assurance Global takes a defined safety, quality, readiness, or assurance assignment, establishes the scope and evidence requirements, performs the agreed work, documents findings and actions, and follows identified problems through to verified correction when that follow-through is part of the engagement.

## CORPORATE DATA

|               |                             |
|---------------|-----------------------------|
| LEGAL NAME    | Safety Assurance Global LLC |
| UEI           | RCUJLWEBGD4                 |
| CAGE          | 16NM4                       |
| SBA VETCERT   | SDVOSB and VOSB             |
| PRIMARY NAICS | 541611                      |
| BUSINESS BASE | Oregon                      |

## CORE CAPABILITIES

### Defined work connected to requirements, controls and evidence

#### Operational Readiness

Review readiness plans, controls, evidence and open actions before critical work, transition or startup.

#### Safety & Quality Verification

Compare approved requirements with field conditions, inspections, records and quality evidence.

#### Contractor Assurance

Evaluate contractor controls, oversight evidence, performance records and corrective-action follow-through.

#### Corrective-Action Validation

Track findings, assigned actions and closure evidence to determine whether identified problems were actually corrected.

#### Incident & Root-Cause Support

Organize incident evidence, contributing-factor analysis, lessons learned and action tracking.

#### Embedded HSE Support

Scope-defined health, safety and environment support tied to field controls, observations, escalation and reporting.

#### Risk & Compliance Support

Review approved criteria, risk controls, documentation and evidence to identify practical gaps and actions.

#### Workforce Training & Workshops

Role-based training and facilitated workforce-development support tied to verified needs and operating context.

## REQUIREMENT-TO-EVIDENCE DELIVERY CYCLE

01  
Requirements intake

02  
Control crosswalk

03  
Field verification

04  
Corrective action

05  
Closure validation

06  
Management reporting

## RELEVANT EXPERIENCE BASE - ATTRIBUTION MATTERS

Selected personnel bring individual prior-employer experience in Port of Portland owner-representative safety; PDX Terminal Core Redevelopment safety leadership; regional crane and rigging operations; Microsoft and Google data-center construction; Boeing 777 work; Intel semiconductor construction; and Washington bridge, trestle, pile-driving, over-water, welding and hot-work assignments.

**BOUNDARY:** These are individual prior-employer projects, not Safety Assurance Global corporate past performance.
